# CHANGELOG 0.1.21

## 0.1.21 rollout news in system portal invoicetoroefact.renware.eu (240203 h09:00)

- 240201piu\_a reorganized `xl2roefact*` components by disseminating the installable application, which is something available "as is now" just for Windows operating system. For Linux there is no difference between command line application and Python package *from an end user point of view*.
- 240131piu\_a `xl2roefact/doc/810.05a-xl2roefact_component.md` clean & transform to "first entry to `xl2roefactPyPi`"
- 240131piu\_a updated `mkdocs.yml`: cleaned navigation, created version variables, updated default site build directory to `docs/`, cleared excluded directories entry
- 240130piu\_b reviewed all changes, update site PDF generator file (mvd `print_page.md` to root) location, fixed navigation. PUBLISHED for `xl2roefact` component
- 240130piu\_a reviewed `xl2roefact` README: cleaned, translated 2 RO, structured to "end user needs"
- 240129piu\_d updated `xl2roefact` to have "Descrierea detliata" link in `810.05a-system_components.md`. Prepared component to be published: `mkdocs.yml` navigation & main site README index
- 240129piu\_c updated all site pages to contain `<small>**RENware Software Systems**</small>` & `[TOC]` after title
- 240129piu\_b cleanup project docs, requirements, fresh install ==> published site as is at this point (invoice template finished)
- 240129piu\_a updated `xl2roefact/README.md` with section for assets download
- 240128piu\_e formal versioning `invoice template` component
- 240128piu\_d updated & closed component `invoice template`. Referred in:
  - `doc_src/810-DSGN/810.05a-system_components.md`
  - portal first page
  - navigation in `mkdocs.yml`
- 240128piu\_c moved `xl2roefact/excel_invoice_template/` directory to root as being distinct component, review it and closed to be published

- 240128piu\_b revised, updated and closed crt version of `excel_invoice_template/README.md`
  - 240128piu\_a updated `xl2roefact/README.md` & `excel_invoice_template/README.md` files, cleared modularization & structure presented in system public site
  - 240127piu\_d Unify main project `/README.md` with `doc_src/index.md`:
    - make the same INDEX just in the project root == index / README of whole project
    - keep from actual project README.md the section ref project identification and move it to end of file as last section
  - 240127piu\_c created `/index.html` to redirect to "real" system index (`doc_src/index.md`) and prevent usage of project `README.md` file instead
  - 240128piu\_c checked work 240127piu\_a, 240127piu\_b, updated `about.md` and navigation with ref to sys structure (`.../810.05a-system_components.md`)
  - 240127piu\_b update system components and their classification (in `.../810-DSGN/810.05a-system_components.md`)
  - 240127piu\_a updated `810-DSGN/810.05a-system_components.md`, defined a classification usable to quickly find out *who-does-what*
  - 240125piu\_a updated `mkdocs.yml` by including `mkdocs-same-dir` plug-in
-
