How to use `xl2roefact` application

General rules

-#TODO plan: - install the application & first setup (use permanently on this computer && offline/no-internet usage) - directory `invoice_files/` and why is recommended to use it (diseminare fisiere perosnale de cele ale aplicatiei, ...)
- configuration items and how change them in file `config_settings.py`

Delivered template usage

-#TODO plan: - write about delivered template things like: - what is good for, type of invoices and their "complexity" allowed - possible usage of "special" items, for example with "Accize" or other special taxes - how right-setup currency - about calendaristic "invoice issue date"

Usage of other invoice excel files

-#TODO plan: - write rules used in `rdinv()` module to corectly recognize Excel data and make JSON invoice file
