CHANGELOG 0.1.22b

0.1.22b xl2roefact application interface improvements (240217 h12:00)

- 240217piu_b updated site with new 0.1.22b deliverables, xl2roefact CLI, WHEEL & DIST
- 240217piu_a automated build of xl2roefact artifacts (on merge to branch build-xl2roefact)
- 240214piu_b make in site a dedicated page for downloads: "Help --> Downloads" and refer it in all places where downloads are intended
- 240216piu_a automated GitHub site build & publishing. FIXED ERROR:
mkdocs_typer._exceptions.MkDocsTyperException: 'run' must be a 'typer.main.Typer' object, got <class 'function'> was changed run object to app_cli one
- 240214piu_c.BUGFIX ref 240213piu_a.FAILED fixed & enabled .github/.../ci.yml. To test by merging to build
- 240214piu_a xl2roefact component (.../app_cli.py) function settings(...) add --rules option (param) to display config_settings.__doc__
- 240213piu_a.FAILED merged for /requirements.txt lief package update as OK-PAS & disabled gh-workflow by renaming ci.yml to ci.yml temp_disabled. Actions tried: (-1.) updated .gh-workflow.../ci.yml (-2.) "small change" in /README.md in copyright year to test (-3.) merge to build branch for test
- 240212piu_e.BUGFIX navigation "xl2roefact --> Referinta CLI" (file /mkdocs.yml). Updated xl2roefact/README.md add a after header "## Comenzile aplicatiei" paragraph "Detalii comenzi:" and ref it accordingly in mkdocs.yml navigation following HTML file, not MARKDOWN one
- 240212piu_d rebuild all deliverables pdm build_all ==> v0.1.22 MSI, WHL, SDIST & moved them to a dedicated _WIP_0.1.22_/ until decide to rebuild or keep
- 240212piu_c added navigation "xl2roefact --> Referinta CLI" (file /mkdocs.yml). Built & published site (mkdocs build).
- 240212piu_b updated .../xl2roefact/app_cli.py to format app logo string as markdown. Updated packages (pdm build_all).
- 240212piu_a review and updated xl2roefact logo (file: ...xl2roefact/__version__). Updated API Reference doc (pdm build_doc). Clean project of obsolete files & open issues
