 - [Optional \(if possible\) checklist:](#)

Mandatory QA checklist

NOTE: *do not delete versions from PyPi except MUST BE DELETED. The version number used cannot be reused even package deleted !!!*

Before to public release a version check and do the following:

- ✓ full chk / review for FIXME & TODOs
- ✓ change release name from ".dev" to final one (change all occurrences)
- ✓ update version string files ref:
 - **xl2roefact** `../xl2roefact/__version__.py`
 - **INVOICEtoROefact** `/__version__`
 - ...not yet rdy, future web2roefact...
 - **site** `/mkdocs.yml` section `extra`
- ✓ build all: app, documentations, site (git branch `build-xl2roefact` or run `pdm build_all`)
- ✓ publish xl2roefact on PyPi (git branch `pypi-publish`)
- ✓ build site (git branch `build-site`)
- ✓ publish site (git branch `publishing`)
- ✓ clean if necessary the `../dist/` directory

Optional (if possible) checklist:

- ✓ archive CHANGELOG old releases in `changelog_history/` (pattern for file name is `CHANGELOG-<version>.md`)
- ✓ archive locally (in `880-RLSE/.../` directory) all resulted deliverable
