# CHANGELOG 0.4.0.dev2

## 0.4.0.dev2 externalize recommended rules for updating app setting rules (240316 T12:00)

- 0.4.0.dev2 externalize recommended rules for updating app setting rules
  - ✓ 1. created `xl2roefact/data/README_app_config_rules.md` containing the recommended rules for updating app setting rules
  - ✓ 2. refer it in `config_settings.py` in its docstring section ==> exported `rules_content` that contain text
  - ✓ 3. update `app_cli.py` module to load them accordingly on `settings --rules` command + option
  - ✓ 4. build this package and publish on PyPi
    - archived locally (RLSE) package wheel & dist
  - ✓ 5. update `xl2roefact README` to reflect that change
  - ✓ 6. build all deliverables
  - ✓ 7. update `downloads.md` with section for "Other resource downloads" with doc from item 1
- 240314piu01 update GitHub `ad hoc` workflow, made usable for any project component by moving structures to project root and letting environment management at command script glance
- 0.4.0.dev1 fixed `xl2roefact CLI` app version addressing
- 0.4.0.dev0 updated `xl2roefact.__init__.py` to expose public symbols
- 240313piu02 small administrative adjustments: update technical `xl2roefact DLD`, build site & republish (used version `0.4.0rc0` for whole system)
- 240313piu01 application tech optimizations: `rdinv.__all__` spec, `__init__.__version__` import and made available as `xl2roefact global`
