## api-to-roefact by RENware Software Systems

- CHANGELOG 0.2.2.dev
  - 0.2.2.dev project development environment improvements (240229 h19:00)

## CHANGELOG 0.2.2.dev

## 0.2.2.dev project development environment improvements (240229 h19:00)

- 240229piu01 updated .../downloads.md for xl2roefact section to link PyPi for versions >= 0.2.1b and let WHEEL & DIST as "Download package source"
- 240228piu04 improved x12roefact python library API Reference document ref to TOC and Title
- 240228piu03 project review, cleanup and update: workflows, useless files, TODO & FIXME comments, etc...
- 240228piu02 FIXED main project for use with PDM. pdm update command successfully run. **RESOLUTION:** pdm can be used in main project as package manager. Should run locally to create venv and must update it with pdm update. 10xG!
- 240228piu01 created a mechanism to run adhoc commands for xl2roefact component:
  - skeleton windows-cmd-file to be run by adhoc script (usable as template) x12roefact/tests/adhoc.cmd (NOTE: running OS = Windows)

  - ✓ documented this feature in /README\_git\_automation\_tools.md
- 240227piu01 improve xl2roefact package documenting the PyPi link to package (https://pypi.org/project/xl2roefact/)
- 240226piu04 published x12roefact package & created automation workflow. Steps;
  - ✓ 0. updated workflow pypi-publish.yml to run on brach pypi-publish.
  - 1. change workflow code to move \_\_msi files in a temporary directory, execute publish then get back moved files
  - 2. drop directories for versions 0.1.18/ & 0.1.19/
  - 3. test packages publish. FAILED.
  - ✓ 4. update doc\_src/.../downloads.md ref crt item 2.
  - 5. build & publish site
  - ∅ 6. update pyproject.toml to update classifiers list according to approved standard
  - 7. update workflow to ignore all old / previous packages (not compliant "classifiers" section)

✓ 8. TEST PASS, here running messages:

```
Uploading xl2roefact-0.2.1b0-py3-none-any.whl = 100%
Uploading xl2roefact-0.2.1b0.tar.gz = 100%
```

- 9. clean workflow code, update pyproject.toml with site URL
- 240226piu03 updated root pyproject.toml (project INVOICEtoROefact) ref x12roefact dependency and ref development dependencies section
- 250226piu02 created empty /draft workflow pypi-publish.yml to be used to PyPi publish x12roefact python packages.
  - Project publisher was registered on PyPi @ https://pypi.org/manage/account/publishing/ for GitHub repository INVOICEtoROefact.
  - Declared PyPi project name: x12roefact
  - PyPi status: Pending publishers @ 240226 06:00
- 250226piu01 improved documentation "visibility" with INVOICEtoROefact components features
