Automation tools

Build site

Merge branch which contains <code>mkdocs</code> site to build into branch <code>build-site</code>. The site will be built according to <code>mkdocs.yml</code> specs.

Build xl2roefact CLI app, library packages and DLD doc

Merge to branch <code>build-xl2roefact</code> . The building process will execute <code>pdm run build_all</code> command. Get back results by merging <code>build-xl2roefact</code> branch back to your initial branch.
