Automation tools

Build site

Merge branch which contains `mkdocs` site to build into branch `build-site`. The site will be built according to `mkdocs.yml` specs.

Build xl2roefact CLI app, library packages and DLD doc

Merge to branch `build-xl2roefact`. The building process will execute `pdm run build_all` command. Get back results by merging `build-xl2roefact` branch back to your initial branch.
