api-to-roefact by RENware Software Systems

- CHANGELOG 0.1.11.dev

CHANGELOG 0.1.11.dev

- 231209piu_c build packages for:
    - ✅ application deployment package ==> `dist/0.1.11-xl2roefact-0.1-win64.msi`
    - ✅ excel invoice template package ==> `dist/0.1.11-excel_invoice_template.zip`
    - ✅ cleaned, tested, created packages (saved to ==> `.../880-RLSE/880.90-RLSE Source Code Archives`)
- 231209piu_b **fixed** `xl2roefact` **CLI options, help, defaults, short names** and **STABILIZED EXECUTION**
- closed `231209piu_a` more actions:
    - changed `README.md` : translated to RO, updated installation & usage information
    - dropped old, obsolete deployment packages
    - test PASS
- 231208piu_b add an INVOICE TEMPLATE (`excel_invoice_template/invoice_template_CU_tva.xlsx`) as deliverable with application
- 231208piu_a review, cleaning and formatting code (generalized & moved some debug-verbose code from `rdinv` to `xl2roefact.xl2json`), test PASS
- 231207piu_b cleaned `rdinv` of "...for debug purposes..." prints, test PASS
- 231207piu_c reviewed and updated `xl2roefact` : README, LICENSE, pyproject.toml
